

## Drive down business cost, drive up business efficiency

### WHY DO I NEED

### ORACLE FINANCIALS?

- Can you access and analyse up-to-the-moment financial data when and where you need it?
- Are your operational applications compatible with your financial systems?
- Are your finance and accounting staff bogged down in mundane repetitive tasks that add no value?

Finance departments are faced with the challenge of generating more information, more accurately and more quickly than ever before. Unfortunately, the typical finance employee spends most of their day entering data and dealing with routine issues. Leaving little or no time for the analysis and planning that is critical to the future success of the organisation.

That's where Oracle Financials can help. A single, integrated suite of applications, it posts all relevant transactions to a central ledger – virtually eliminating routine administrative tasks. At the heart of the world's most comprehensive suite of business software, it's your route to reduced costs and improved efficiency.

### HOW DO I SELL IT TO

### THE BUSINESS?

- Every organisation needs to control costs, manage cashflow and grow its profits.

- Oracle Financials is a state of the art financial management suite that gives you that control.
- Oracle Financials puts financial data at your fingertips and makes analysis much easier. Providing you with the data interface and analytical tools you need to drive business efficiency and reduce operational costs.
- Oracle Financials is fully web enabled. Regardless of where your operations are sited or where your people work, your financial data can be accessed and analysed at any time under strict control and rigorous security.
- Finance staff can be liberated from the mundane aspects of their role, freeing up time and resource to focus on more strategic issues.

### IS ORACLE RIGHT FOR

### MY ORGANISATION?

Oracle is not just for large corporations. The E-Business Suite is a truly scalable solution, providing the opportunity to realise real business benefit through the implementation of additional, integrated modules in each and every area of your business.

By driving efficiency into your business processes and consolidating your applications software and hardware platform, your return on investment is assured. The Praktis rapid implementation approach to Oracle Financials ensures

your organisation has the basis of an affordable route to the full Oracle solution.

### HOW WILL IT BE

### IMPLEMENTED?

At Praktis, our implementation approach is designed to give the maximum benefit in the shortest time, whilst also ensuring that cost and risk are controlled. We can offer an entry-level solution, including the hardware platform of your choice for £150k. A preliminary engagement at a fixed price will deliver a scope and objectives definition. This document will define your project in terms of goals, functional and organisational scope, resource and project execution plans and cost.
